TECHNOLOGIES THAT DRIVE PERFORMANCE

Pulse ZR® II Clipper

INTEGRATED BATTERY MONITOR

Our newest battery design includes an internal battery monitor. Simply push the status button and an LED light tells you the status. Red indicates it is time to charge; green indicates you are ready to clip. See page 4.

REMOVABLE BATTERY

Eliminate downtime...charge the battery separately and keep clipping with a fresh one. Our improved battery life delivers up to 3 hours of non-stop run time! See page 4.
PERFORMANCE

Excel® Cordless Clipper

**BRUSHLESS MOTOR**

Our brushless motor clippers make easy work of even the toughest clipping jobs! With more power and torque than standard rotary motors, our brushless design features advanced circuitry that prevents dragging or stalling. See page 5.

Endurance Clipper

Andis engineers also designed our Endurance clippers to last longer than any previous animal clipper we’ve made—10,000+ hours! See page 5.

---

**To create the side skirt for a Westie, always start with a freshly washed and brushed dog.** The side skirt begins just at the widest part of the ribcage, meaning that is where you will want to blend off your clipper work. The skirt should be under that line. Be careful not to confuse the pattern with the American Cocker Spaniel or Schnauzer by leaving the skirt too high or too low. You will want the dog to look as natural as possible, so use a longer blade or even attachment combs that are closer to the breed standard length. Clipping the hair with the direction that it lays will help prevent lines. Using the Andis Deshedding Tool (pg. 11) to touch up the clipper work and pattern lines will aid in better blending, preserving the texture and color.
